

# You read the time of the binary clock?

You are an experienced administrator, familiar with the relevant technologies and providers and have already managed web applications in cloud systems? Great. For the conception and introduction of a new cloud service we are now looking for an

## > Administrator/ Cloud Engineer (m/f/d, full-time)

At Hallo Welt! you will be responsible for selecting the necessary cloud components for our enterprise Wiki software „BlueSpice“. Furthermore you will be implementing software components as distributed systems (load balancers, ElasticSearch clusters, MySQL replication) and provide performance, stability and availability in the cloud.

In addition you will ensure that BlueSpice is implemented for customers and that the software is integrated into their virtualized system landscape (docker, VM, scalable infrastructure).

**If you also provide the following skills, we should get to know each other soon:**

- you are familiar with the concepts of distributed systems,
- you have experience with the orchestration of containers,
- you work very conscientiously and can organize yourself well and
- you are fluent in spoken and written English.

### As an administrator we offer you:

- state-of-the-art technologies,
- scope for design in a small but fine team,
- challenging activities and continuous learning,
- contact to MediaWiki and other exciting projects,
- access to a global community of developers.

### As an employee we offer you:

- a position in a healthy, fast growing company,
- a future-proof and unlimited employment relationship,
- a flexitime model that can be individually adapted,
- flat corporate structures in a friendly work environment,
- and a job in one of the most beautiful cities in Germany.

Please send your application via e-mail to: [career@hallowelt.com](mailto:career@hallowelt.com)

Hallo Welt! GmbH, P.O. BOX 11 02 19, 93015 Regensburg
